Subject: RE: CSB, experts -- chemical spill case -Phil Myers

Martin and Perry,

I haven't dealt with Mr. Myers, but on the question of whether EPA has any suggestions on experts, I wanted to point out that Ron Landy, the Regional Scientist, may be able to help in that regard. I've used Ron before in helping me search for technical experts or find out more about them. Something like tanks may be a little out of his range, but it may not hurt to ask because even if he doesn't know, he may know who to ask. This is Ron's contact information:

Regional Science Liaison

- [Ron Landy](#) (landy.ron@epa.gov)
Regional Science Liaison
[EPA - Environmental Science Center](#)
701 Mapes Road
Fort Meade, MD 20755
410-305-2757

- Regional liaison to the [Office of Research and Development](#); provides technical and programmatic assistance in developing research and applied research goals and objectives

- co-chairs the Regional Science Council and represents the Region on the [National Science Council](#)

Best of luck, Dan

Please see Perry McDaniel's inquiry below, and respond to him and me if you have dealt with Mr. Myers. Thanks.

Subject: CSB, experts -- chemical spill case

The CSB has hired Phil Myers as an expert on above-ground storage tanks. USAO wants to know: if EPA has ever dealt with Myers; if EPA has any suggestions on experts; EPA's thoughts on sharing expert with CSB?

Can send inquiry to LCD/RCEC list or more targeted audience -- your thoughts?
